

PS3 external power supply

The external power supply in weatherproof box mod. PS3 allows to feed the IR illuminators mod. **NYX ELI** 40-40DI-80-80DI directly from a 230Vac network voltage, with an output power of 50VA, ensuring in this way a maximum installation flexibility. To complete the range you can have the same power supply, but with a 110Vac supply voltage.

- DATA SHEET -

external power supply

the values are in millimeters

Input: 230Vac
Output: 24Vac
P max: 50VA
Dimensions: 163x123x83
