

PS4 external power supply

The external power supply in weatherproof box mod. PS4 allows to feed the IR illuminators mod. **NYX ELI** 160-160DI directly from a 230Vac network voltage, with an output power of 100VA, ensuring in this way a maximum installation flexibility. To complete the range you can have the same power supply, but with a 110Vac supply voltage.

- DATA SHEET -

external power supply

the values are in millimeters

Input: 230Vac
Output: 24Vac
P max: 100VA
Dimensions: 163x123x83
