Compact Full HD Megapixel IP camera made of stainless steel for discreet surveillance

TBX6320 is a compact Megapixel IP camera specially designed and optimized with an extremely performing sensor for applications that require surveillance in scenes with different lighting levels; the extended dynamic mode ensures detailed images even in critical lighting conditions.

The camera is available in 1080p resolution with motorized zoom, autofocus and delivers up to 60 images per second. The connection system facilitated by means of a Plug & Play connector with quick coupling allows to optimize installation and/or maintenance times.

The construction in sturdy electropolished AISI 316L stainless steel makes it particularly suitable for installation in particularly aggressive environments (steel mills, chemical industries, etc.) or in areas with high salinity such as coastal areas, ports, oil rigs, etc.
